Principal's Message

As we race towards the end of Term Three, it is always refreshing to take a second to stop and reflect on the great things going on for Team Tauhei. A visit from Sophie from Project Energise taught us about the importance of a healthy start to the day with a good breakfast, which has also resulted in a lot of students checking the packaging and reading the numbers on the side to see how it stacks up on the healthy eating radar. Whaea Trinette and Fantail Class has been diving deep into Maui and his stories, as well as The Iron Man study in Tui class creating some positive learning challenges for our seniors. An exciting close to the term is just ahead of us.

"Don't watch the clock; do what it does. Keep going."

MEASLES WARNING WITH NEW CONFIRMED CASES IN THE WAIKATO

The Medical Officer of Health has been notified of three confirmed cases of measles in the Waikato region in the last two weeks, all linked to South Auckland.

"The Waikato public need to know that the risk of further cases is high," states Waikato DHB Medical Officer of Health Dr Richard Hoskins, "either from people getting exposed to measles out of the region, or from exposure to local cases before they are diagnosed and isolated".

"We are still working to identify all the exposed people from the two most recent cases, so far it looks like we can identify and contact them directly," says Dr Hoskins.

Measles can be very serious and spreads very easily, it is important:

- That people planning to go to Auckland should check they are fully immunised first, kids down to 12 months of age can have MMR1 early if going to Auckland (or high risk country overseas which would be via Auckland anyway) and need to wait two weeks after MMR before travelling.
- People aged 1-50 who can't show they are immune, and therefore don't know they are immune, to find out or have catch up immunisation at a medical centre. Catch up immunisation is FREE.
- To know you are immune, you need to have had two doses of measles containing vaccine, or have had measles, or had a test showing measles immunity.

Signs of measles and what to do

Anyone who thinks they may have measles should telephone their doctor or Healthline (0800 611-116). If you need to be seen it is important to call ahead because measles is highly infectious and people with measles can pass it on to others in waiting rooms, etc. If you call ahead arrangements can be made to reduce the risk of you spreading measles to others.

"Measles is easily passed from one person to another. Already this year there have been more cases of measles than any year since the 1997 epidemic. Most cases are just north of us in Auckland. There is no sign of the spread slowing. The best form of protection is immunisation with two MMRs," said Dr Hoskins.

What to do if you can't show you are immune to measles and are exposed to someone with measles

People who are regarded as not immune to measles are:

- People younger than 50 years old (born after 01 January 1969) who have not had two doses of measles vaccine (usually MMR) or have not had a laboratory result showing immunity.
- Children over four years old who have not received their second dose of MMR vaccine.
- Infants under the age of 15 months or who have not received their first routine MMR vaccine. These babies are usually susceptible to measles infection and rely on everyone else to be immune so that measles does not spread to them.
